

FOR COLLEGES & UNIVERSITIES

Communication confidence for campus and career.

Practical mentor-led programmes for interviews, presentations, group discussions and the first months at work.

Built for active practice — not grammar lectures.

Knowledge creates potential. Communication makes it visible.

Employers and institutions increasingly need learners who can think, express and collaborate in real situations.

CAREER READINESS

Communication is a core employability competency.

Students must exchange ideas clearly, listen actively and adapt to different audiences.

HUMAN SKILLS

Human-centred skills matter as work keeps changing.

Analytical thinking, resilience and collaboration remain central to workforce transition.

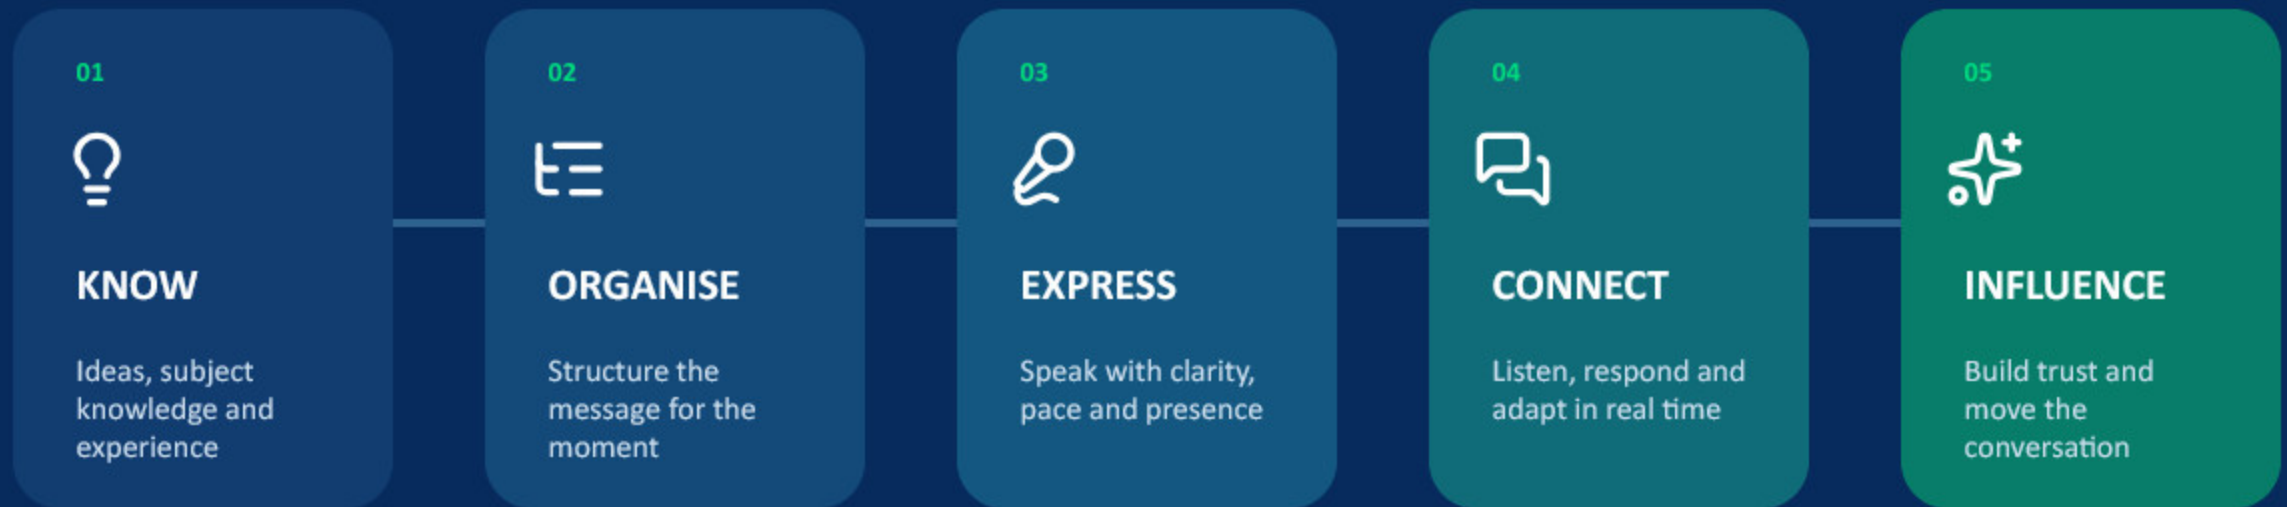

SKILLS-FIRST

Learning is moving closer to demonstrable skills.

Confidence, presence and practical communication make capability easier to recognise.

Students often know more than they can confidently show.

The challenge is rarely knowledge alone. It is turning that knowledge into a clear, credible response under pressure.

UNMUTE PRO TRAINS THE WHOLE JOURNEY

Practice the conversations that shape opportunity.

The programme is built around real student and early-career situations.

INTERVIEWS

Self-introduction, STAR stories, follow-up questions and recruiter conversations.

PRESENTATIONS

Open strongly, structure ideas, handle questions and close with confidence.

GROUP DISCUSSIONS

Enter the discussion, build on ideas, disagree politely and include others.

FIRST JOB

Meetings, status updates, feedback, workplace etiquette and professional presence.

Confidence grows through a visible practice loop.

Every session moves learners from awareness to application — with mentor feedback at the centre.

Choose a focused workshop or build a complete cohort journey.

Programmes can be adapted by department, year, level and placement calendar.

4 OR 8 WEEKS

Campus Communication Bootcamp

Speaking confidence, presentation structure, group discussions and professional expression.

COHORT PROGRAMME

Placement Readiness Lab

Self-introductions, interview stories, mock interviews, body language and recruiter conversations.

ONGOING PRACTICE

SpeakUp Campus Club

Peer speaking challenges, mentor sessions and a repeatable communication-practice culture.

CAREER LAUNCH

First Job Communication

Meetings, email, updates, feedback, workplace etiquette and confident collaboration.

PLACEMENT READINESS LAB

Make every answer clear, credible and human.

A practice-intensive track for the moments between application and offer.

Introduce

Tell me about yourself — with a story, not a script.

Structure

Use clear examples and STAR stories without sounding rehearsed.

Respond

Listen, clarify and handle follow-up questions calmly.

Improve

Use mentor feedback to retry the answer immediately.

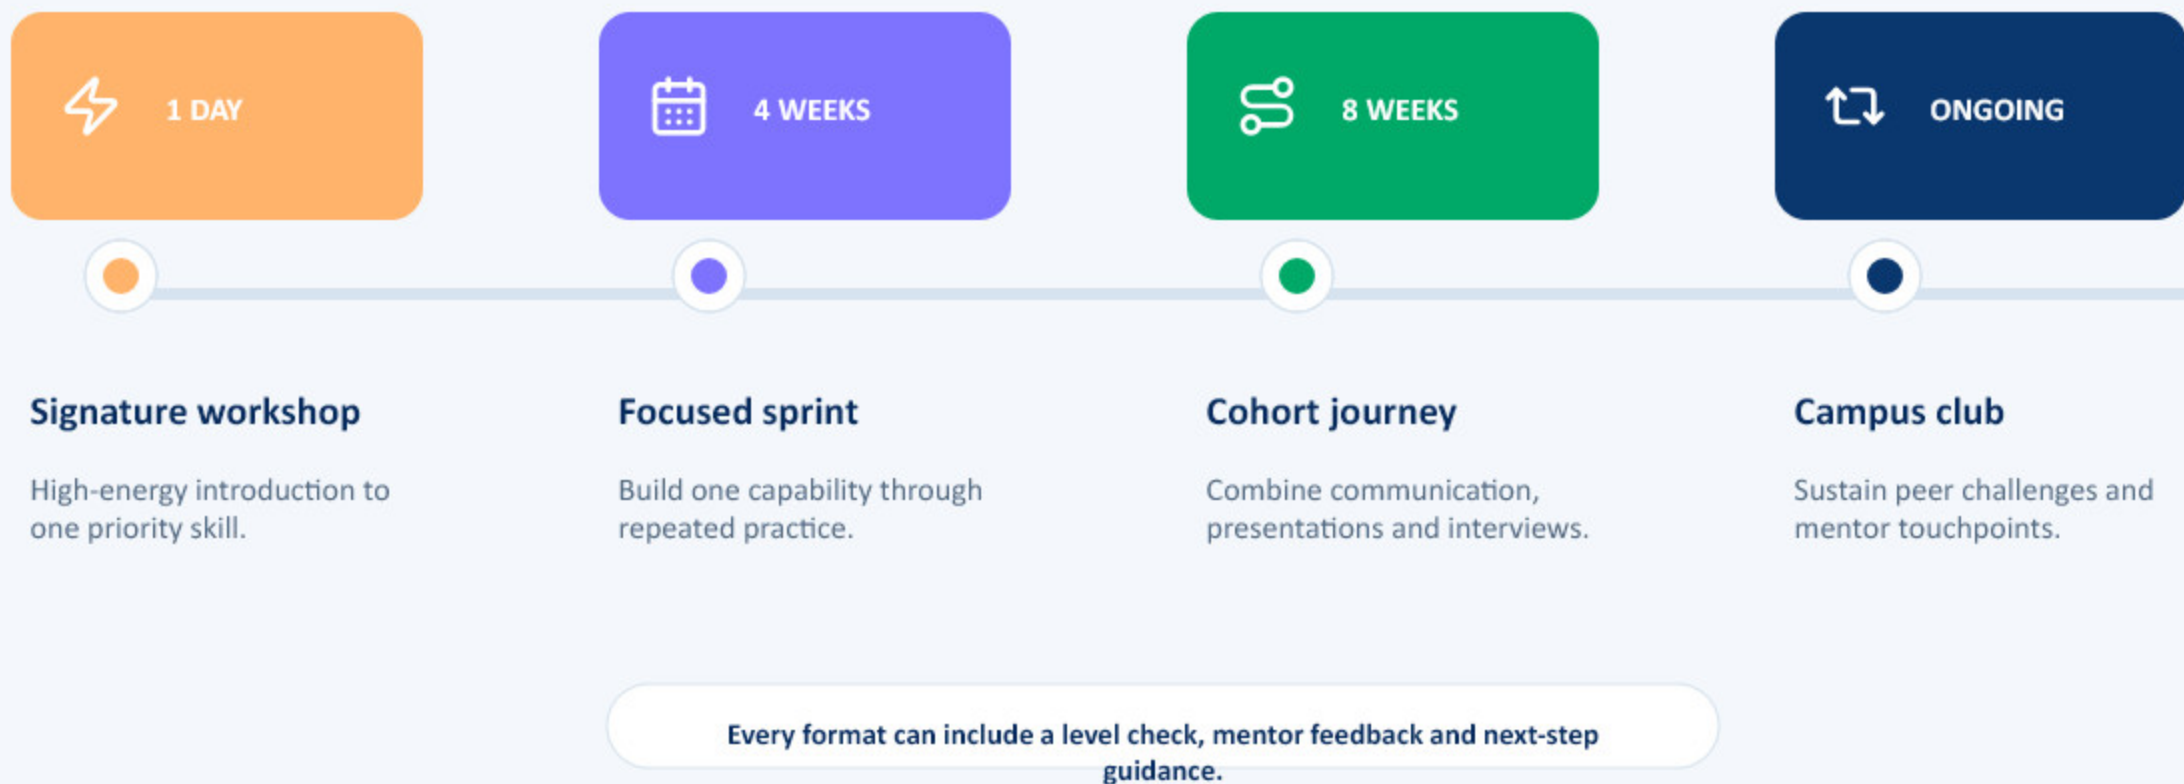

A programme your placement team can see and use.

Training can include baseline checks, participation visibility and a concise final cohort insight — not just session delivery.

Start with one moment. Scale into a campus culture.

On campus or online, with a format matched to the placement calendar and learner need.

15+ YEARS

corporate experience

THE MENTOR DIFFERENCE

Students need feedback from someone who understands real workplace conversations.

Manibabu combines corporate experience with confidence-focused practice — helping learners improve without fear or embarrassment.

Corporate context

Examples shaped by interviews, meetings, presentations and workplace expectations.

Human feedback

Practical corrections delivered with empathy, clarity and respect.

Goal-based practice

Activities connected to the learner's placement or career moment.

From hesitation to a clear, confident voice.

These are illustrative transformation statements — designed to be replaced with verified learner stories after the first campus pilot.

"I know the answer, but I freeze."

"I can structure my point and begin."

"I avoid speaking in groups."

"I can enter, build and respond politely."

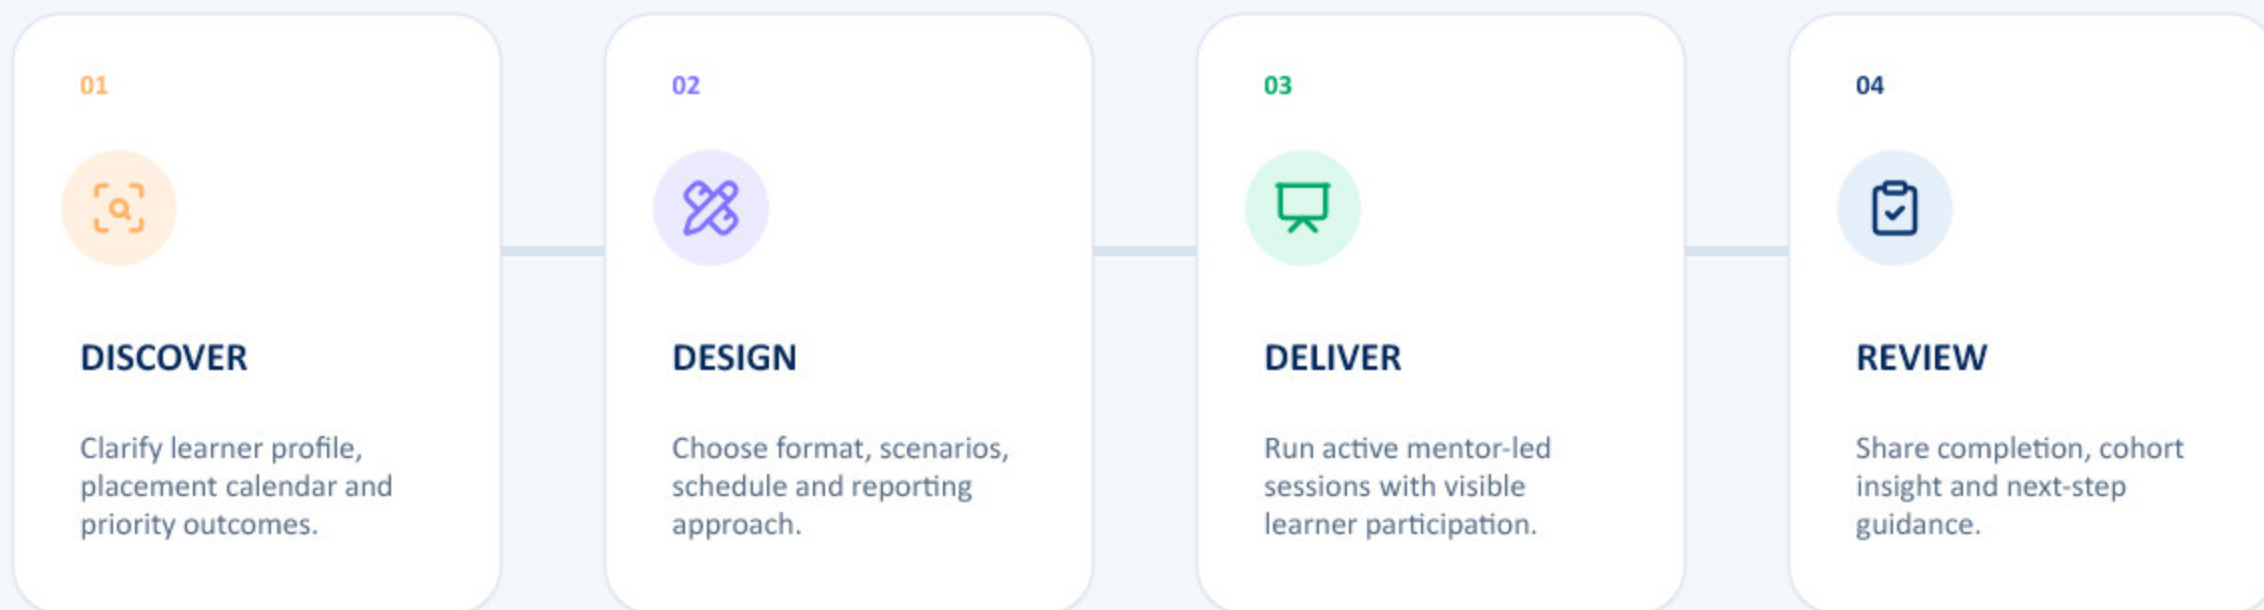

"Interviews feel unpredictable."

"I know how to listen, think and answer."

From campus need to confident practice.

A clear four-step partnership keeps the programme relevant, practical and measurable.

Typical next step: a 30-minute discovery call with the placement team

LET'S BUILD A CAMPUS PILOT

Help students show what they know.

Request a campus presentation, focused workshop or cohort proposal.
